

## Site Design and Build

Our Motto is:

On Line - On Time - On Budget.

When we give our customer a quote we tell them when their site will be available to the public, how much it will cost to design, build and host, and we keep to that quote.

We are able to provide simple sites of just a few pages, right through to database driven sites containing hundreds of pages.

Some of the sites we have built in the past include:

- Shopping sites with on-line payment.
- Membership sites, with or without fee collection.
- Estate agencies using a variety of different products.
- Personal Pages.
- Advertising Sites.

The cost of your site includes:

- The registration for one year of your chosen domain name registered in your name or your company name.
- Your first months hosting fees.
- A site built as agreed between you and us.
- Technical support for the first month.
- A maximum of 50 email accounts.

We will be happy to discuss any requirements, if we are unable to create the site you need, we will attempt to put you in contact with another developer who can.
